Playing advice
For each marked section, see below for an explanation of the important points.

**Intro**
- The fourth-bar fill is a bass drum and crash cymbal roll. You can practice using the score on the right.
- The syncopation in the fourth and fifth bars comes from the accent provided by the weak beat. The second beat in the fifth bar is crucial. You have to get it just right to cleanly revert to the previous rhythm.
- Add a surge of excitement to the seventh and eighth bars with a crescendo. Simultaneously beat the snare drum and floor tom. You have to synchronize exactly the striking of your left and right hands.

**A**
- To effectively play open Hi-hat, simultaneously raise the right foot on the bass drum pedal and the left foot on the Hi-hat pedal. Practice by using the score on the right. It’s a good idea to practice using just your feet.

**B**
- While this may look difficult, treat it just like a simple 8-beat pattern using the bass and snare drums. All you have to do is insert a ride cymbal in the back beat. Use the score on the right to practice. Start slow and practice as long as possible.

**C**
- Use the rest in the eighth bar of [B] to quickly change to the HD-1 kit sound.
- Use a fermata to perform a fitting end to the cymbal and bass drum roll.
Learn drum notation and basic musical symbols

Learn percussion notation and the symbols for each instrument
Percussion scores use the standard 5-line staff used for musical notation. Match the symbols to the instruments shown on the left page.

Get acquainted with basic musical-notation symbols
In a percussion score the duration of notes and rests is marked like that of normal music scores. You can use the tables below for reference.
